

A Project On amusicz.com ONLINE MUSIC STORE

*SUBMITTED IN THE FULFILLMENT OF THE REQUIRMENTS FOR
THE AWARD OF DEGREE OF*

GRADUATION OF COMPUTER

IN

BACHELOR OF COMPUTER APPLICATION

OF

PT. RAVISHANKAR SHUKLA UNIVERSITY

SUBMITTED BY:

Mr. S. Azhar Qureshi

&

Mr. Nipesh Prajapati

UNDER THE GUIDANCE OF

(H.O.D) MR. AMITESH JHA

HEAD OF THE DEPARTMENT OF COMPUTER SCIENCE

IN THE INSTITUTE OF

PRAGATI COLLEGE

CHOUBEY COLONY, RAIPUR - 492001

(CHHATTISGARH)

SESSION-2008-2009

DEPARTMENT OF BACHALOR OF COMPUTER APPLICATION

CHOUBEY COLONEY, RAIPUR - 492001
(CHHATISGARH)
SESSION – (2008 – 2009)

CERTIFICATE

THIS IS CERTIFICATE THAT THE PROJECT REPORT ENTITLED
“Online Music Store Application” WHICH IS BEING
SUBMITTED BY

S. Azhar Qureshi
Nipesh Prajapati

IN FULFILLMENT OF THE REQUIRMENT FOR THE AWARD OF DEGREE
(BACHALOR OF COMPUTER APPLICATION)”FINALYEAR” OF PT. RAVISHANKAR SHUKLA
UNIVERSITY, (CHHATTISGARH) AT PRAGATI COLLEGE, RAIPUR (C.G)
IS RECORD OF STUDENT OWN WORK CARRIED BY HIM UNDER MYSUPERVISION AND
GUIDANCE.

ABSTRACT

The software is developed based on **ONLINE MUSIC STORE** Information. The major features of the software are:

- I Software developed using GUI for ease of use.
- II extremely user friendly Software.
- III Easy to search and play the new latest songs.
- IV Easy to give ratings on the songs.
- V From thousands of nominees' final 14 wonders details are Available

This project provide the information about the **NEW7WONDERS**. This is exclusive Software, which gives various facilities to the user i.e. viewing the details of places which are GOD gifted present in nature ,voting to make your wonders. Gives the abstract details, which are very helpful for administration purposes.

ACKNOWLEDGEMENT

Thanks giving seem to be the most pleasant of all jobs but it is none the less difficult when one tries this to put them in words.

Can this humble word & the expression or gratitude really convey the heart felt knowledgement that are due to the weak words & the expression fainter than what it should be.

We express our profound gratitude to Mr Amitesh jha sir &

I would like to thanks all teacher who have given him/her valuable

time,suggestion & support in the making for this project.Not

only this, he/she helped me in debugging & eliminating the problem

faced by us in the completion of this project.

Last but not least, I would like to thanks my family members,friends & all other well wishers who have directly

to or indirectly co-operated , encouraged & inspired us
achieve our target.

S. Azhar qureshi

nipesh prajapati

INTRODUCTION

***Every “web site has its own policies ,
rule , procedure and administration
methods to
develop & Impliment these methods &
policies.***

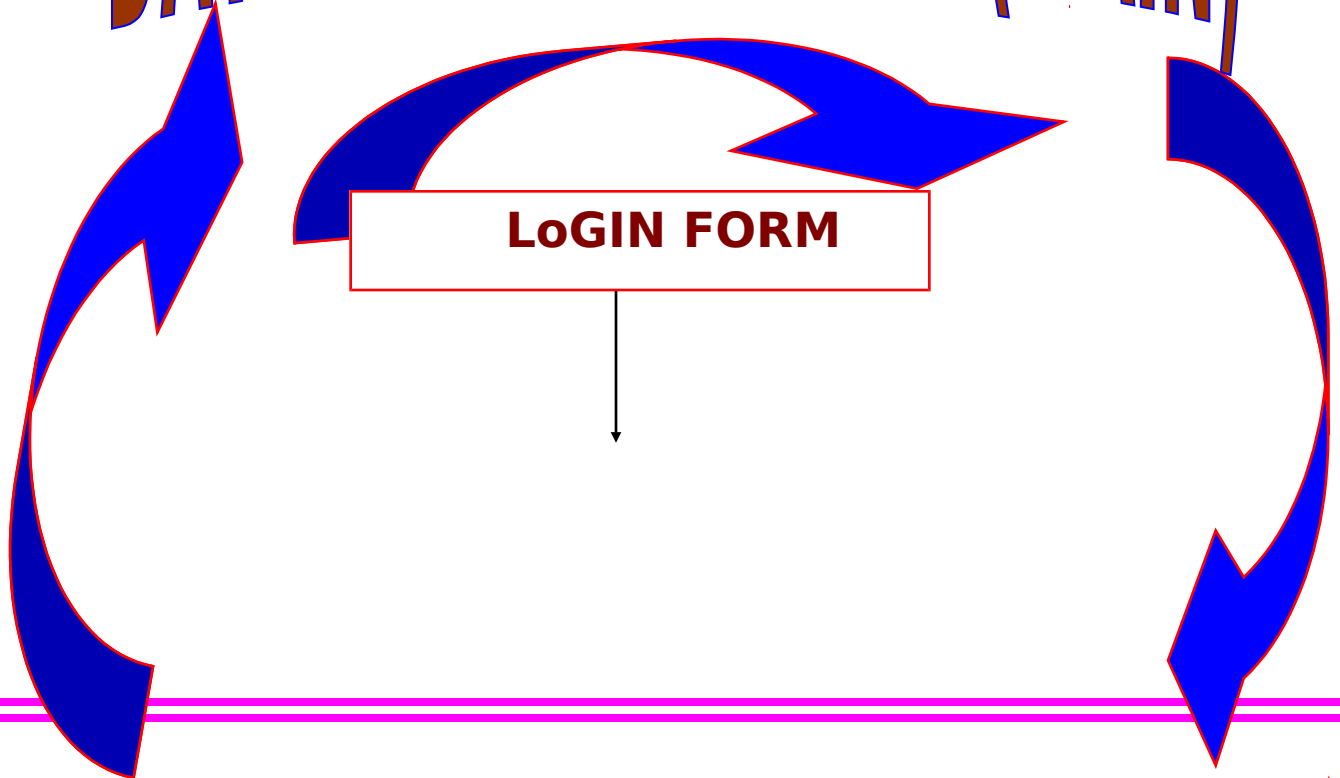

***Every web site has made several department
&
has to be trained or to be provide training
that
time to improve their efficiency.***

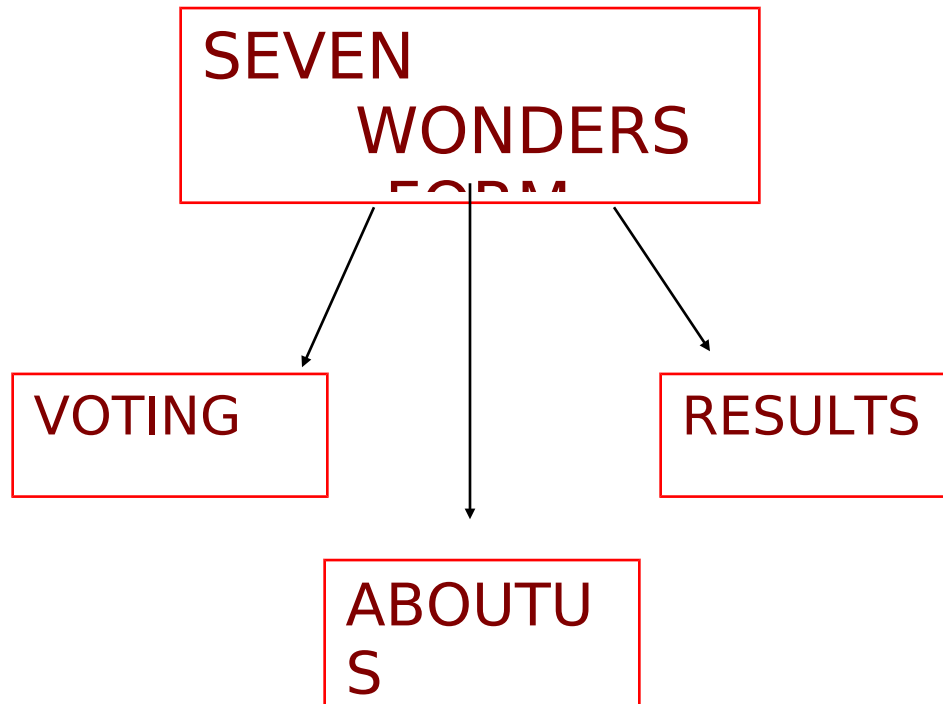

“online music store” project is developed in frontpage and jsp (java server page)

This is a project entitled as “online music store”

This cover only the places information WHICH ARE TODAY'S TOP SEVEN WONDERS AND ALSO THE TOP 14 WONDERS WHICH ARE IN FINALE SELECTION And finally the VOTING Form .

DATA FLOW DIAGRAM (MAIN)

Hardware Requirements

*Hardware is the physical component of a computer
Which includes cpu, internal storage units input output unit Other*

peripherals or any other device that can be used in Conjunction with these unit. Broadly ,hardware can be termed as the electronic circuit used in building the computer that executes the software.

- *Color monitor*
- *3!2 floppy drive*
- *Hard disk min 10 GB*
- *RAM 10 MB*
- *Mouse Scroll AC2*
- *Keyboard*
- *CD ROM Drive 48x*

Software Requirements

Software is the list of instruction to be executed by a computer. Software is the part of computer system enables the Hardware to operate software is an essential requirement of the computer system.

- **Windows 98/2000/XP**
- **Frontpage**
- **MsAccess**
- **JSP(java server page)**
- **Apache-Tomcat-5.5.25**

About Software
About Software

1. About Frontpage

Microsoft Frontpage is a web-authoring tool. FrontPage is designed to hide the details of pages HTML code from the user, making it possible for novices to easily assemble and publish webpages and sites in a Windows-like environment, without learning HTML, Javascript, or CGI.

2.Jsp(java server page)

JavaServer Pages (JSP) lets you separate the dynamic part of your pages from the static HTML. You simply write the regular HTML in the normal manner, using whatever Web-page-building tools you normally use. You then enclose the code for the dynamic parts in special tags, most of which start with "<% " and end with "%>". You normally give your file a .jsp extension, and typically install it in any place you could place a normal Web page.

Although what you write often looks more like a regular HTML file than a servlet, behind the scenes, the JSP page just gets converted to a normal servlet, with the static HTML simply being printed to the output stream associated with the servlet's service method. This is normally done the first time the page is requested, and developers can simply request the page themselves when first installing it if they want to be sure that the first real user doesn't get a momentary delay when the JSP page is translated to a servlet and the servlet is compiled and loaded. Note also that many Web servers let you define aliases that so that a URL that appears to reference an HTML file really points to a servlet or JSP page.

3. About Access

The Micro Soft Access is more widely used a powerful windows based relational

database management system (RDBMS) that can be create and maintain small database.

A database is a place where the information is stored. A box of three-by-five index cards can be considered as a database.

The most basic component of a database is a table – a collection of information stored in records (rows) and fields (columns).

Tables are the basic buildings blocks of a database. In addition to tables, a database can include forms, queries, reports and other components, all of which allow us to manipulate and View the database information in a Varsity of ways.

Basic Feature and Advantage of Micro Soft Access.

- ❖ Access is a powerful RDBMS used to create and maintain database under Windows environment.**
- ❖ A database is a collection of related tables,Table consist of record and fields.**
- ❖ Filds have different data types depending up on the information that has to be stored.**
- ❖ All fields have a set of properties that can be modified to change the behavior of the field.**
- ❖ Micro Soft Access provide us to back-End Tool**

4. About Apache-Tomcat

“Tomcat is the servlet container that is used in the official Reference Implementation for the Java Servlet and JavaServer Pages technologies. The Java Servlet and JavaServer Pages specifications are developed by Sun under the Java Community Process.”

Apache Tomcat 5.x provide

- **Performance optimizations and reduced garbage collection.**
- **Refactored application deployer, with an optional standalone deployer allowing validation and compilation of a web application before putting it in production.**
- **Complete server monitoring using JMX and the manager web application.**
- **Scalability and reliability enhancements.**
- **Improved Taglibs handling, including advanced pooling and tag plugins.**
- **Improved platform integration, with native Windows and Unix wrappers.**
- **Embedding of Tomcat using JMX.**
- **Enhanced Security Manager support.**
- **Integrated session clustering.**

Conclusion

It has been a great pleasure for me to work on this existing and challenging project.

This project is small module of large software, which is for “NEW7WONDERS”.

This project proved good for me as it provided practical knowledge of not only about programming in jsp page but also get information about wonders of the world .

This will provided better opportunities and guideline in developing projects independently.

Enhancement

—

A software is called incomplete if it doesn't fulfill the requirement of the user. It happens due to lack of proper communication between user and developer or sometimes due to limitation of time. This software is prepared in very short period. so that the many of the things are left.

In case of these project which is developed in JSP, We try to make it complete as per user requirement

but we haven't sufficient time to fulfill all the requirements.

For example there is no map layout show from which region each wonders belong the second thing is that viewer can't see all picture of the nominees b'cs there were thousands of nominees and we are unable to show all picture of each country and city.
