Corrispondenze per Codice

This catalog contains cross reference to filtration and exhaust products from Donaldson locations around the world...Europe, Asia, Australia, South Africa and the Americas.

Donaldson®

Table of Contents

Índice • Table de Matières • Inhaltsverzeichnis • Indice

This catalog contains equipment manufacturers' and competitive filter manufacturers' part numbers cross referenced to the Donaldson part number. The manufacturers' names are abbreviated in the catalog. If you need to reference a code to the manufacturer's name, please refer to page 9.

The data published has been gathered from multiple Donaldson locations. Not all items will be available in your area, so for availability check with your local Donaldson authorized distribution outlet.

Donaldson®

Donaldson® Endurance Air Filters

Nanofiber Technology at Donaldson 25 Years and Counting!

Since Donaldson Torit® first introduced Ultra-Web® nanofiber cartridge filters to industrial manufacturers more than 25 years ago, the technology has been continually advanced and perfected to deliver both lower emissions, higher efficiency and longer filter life.

Ultra-Web nanofiber filtration technology strikes just the right balance between the strength of the fiber density of the web and the level of filtration. Ultra-Web nanofibers produce a very fine, continuous fibers that form a permanent web-like net that traps dust on the surface of the filter media.

Ultra-Web®

Nanofiber Filtration by Donaldson

Ultra-Web nanofibers have submicron diameters and small interfiber spaces, which result in more contaminant being captured on the surface of the media and lower restriction.

Extended Filter Service Intervals

For vehicle owners, Ultra-Web technology can be found our Donaldson Endurance™ air filters and is proven to go twice the distance compared to a conventional cellulose filter.

Remember, others may have nanofiber technology for diesel engine filtration, but no other engine filtration company has 25 years of experience and knowledge about nanofiber filtration technology as Donaldson.

Filter Performance Alternatives

Use this section to see what alternatives are available for a standard filter listed in this catalog. Look up the number in the first column and additional filters with different filter media will be listed in the second and third columns.

Donaldson engineers work closely with original equipment manufacturers to design filtration systems for a particular vehicle/engine and its operating environment. Perhaps you are interested in protecting your engine and reducing your operating costs with extended life filters.

A **Donaldson Endurance™** designated filter is what we recommend if you're looking to extend filter service change intervals or looking for higher efficiency compared to a cellulose media filter.

A filter with **CELLULOSE** media meets typical original equipment performance requirements. In most cases, this filter performs the same as the one originally supplied with your engine or vehicle.

SYNTEQ™ filter media can be found in Donaldson lube, fuel and hydraulic filters. In all cases, the filter provides a higher level of filtration efficiency than filters with cellulose media.

There are air filters that are **CELLULOSE-LONG-LIFE**. Cellulose, long-life filters are ideal when you want to service your air filter by restriction measurement.

An air filter with **TREATED** media is designed for on-highway vehicles operating in high carbon environments.

An air filter with **HIGH PULSATION** media is generally used in one and two cylinder engine applications (gen sets) non-reciprocating air compressors where the air cleaner experiences excessive intake air pulsation.

An air filter with **FLAME RETARDANT** media contains UL approved media. UL approval indicates suitability for operating in flammable applications. Flame retardant filters have the Duraguard marking on the end cap of the filter.
