Golf R Estate is more than a bigger boot

THE fast estate is a car that any petrolhead can get on board with. If you can move a chest of drawers and still have a blast at the weekend, what's not to love? Volkswagen has simply added extra boot space to the ballistic Golf R, and it might have just made a brilliant everyday performance car even better.

Elongating the Golf's profile gives it a more elegant, classic silhouette. Our feelings are that the optional (but more attractive) five dual-spoke wheels are worth adding.

Adding an impressive 225 litres of boot space is only part of the story. As an estate this version gives you the option to slot things like household appliances in without necessarily having to drop the back seats.

Huge acceleration comes courtesy of grippy tyres, four-wheel drive and 296bhp. The irregular

chorus of chatter from the exhaust adds tangible excitement to the experience far in excess of what the Golf GTI can muster. De-restricted it'll top 170mph. If we're super-picky there's only one black mark we can lay against the R estate's performance.

No matter how hard we tried on the superb Ascari Race Resort track, we couldn't get the R to feel rearward balanced. It's so neutral, stable and confidence-inspiring, but it's impossible to recreate a rear-wheel drive feel. That might put a dampener on some people's enthusiasm.

To add the estate boot is a mere £695 box-ticking exercise, so why wouldn't you? On the other hand, it already costs more than a BMW M135i.

Make no mistake, the Golf R estate is a laugh-out-loud marvellous everyday car. It ticks most of the weekday boxes with ease and laps up high-adrenaline action on country roads or the race track at the weekend.

Modernised but its cramped in the back

AT LONG last the C-Max, Ford of Europe's third-best-selling model, has been brought into line with the One Ford programme, so there are new looks, new technologies and a simplified cabin.

This, the seven-seat Grand C-Max, has had the same upgrades. Smaller revisions have made their way in too, like the reinstatement of a spare wheel in lieu of the (generally useless) tyre repair kit.

The Grand C-Max loses some of the five-seat version's looks, for which you can blame the higher roof line and metal channels to allow the rear doors to slide backwards.

Despite the brilliantly practical sliding rear doors things are rather cramped in the very back. The middle row can slide forwards to expand the non-existent foot space back there, but then that cuts down on space for those in row two.

There are two overwhelming and lasting impressions from a drive in the Grand C-Max. The first is how pleasantly well connected it feels to the road.

The second is there is too much interference from the new active safety systems. Graphics blink away with readouts of your proximity to other cars, steering wheel vibrations warn you when you're at the edge of your lane and annoying beeps and flashing warnings tell you when the car thinks you're going to hit

something, which, invariably, you're not.

The pricing structure centres around a core of likely volume-sellers between £21,000 and £25,000, making it a relatively affordable route into a well-specified seven-seater.

Clearly, families are the target market. Generous parents with only two kids will appreciate the ability to ferry extra young 'uns around, and productive mums and dads with limited parking space at home will appreciate the Grand C-Max's neat dimensions.

This car summed up in a single word – advanced.

If this car was a car designer it would leave itself largely as it is, but it might ditch some of the electronic interruptions.
