

Fusion Center Locations and Contact Information

State and major urban area fusion centers (fusion centers) are owned and operated by state and local entities, and are designated by the governor of their state. In accordance with the [Federal Resource Allocation Criteria \(RAC\) policy \(PDF, 144 KB, 4 pages\)](#), which defines objective criteria and a coordinated approach for prioritizing the allocation of federal resources to fusion centers, the federal government recognizes these designations and has a shared responsibility with state and local governments to support the national network of fusion centers.

The following includes the list of primary and recognized fusion centers ([associated contact information](#)). Primary fusion centers serve as the focal points within the state and local environment for the receipt, analysis, gathering, and sharing of threat-related information and have additional responsibilities related to the coordination of [critical operational capabilities](#) across the statewide fusion process with other recognized fusion centers. Furthermore, primary centers are the highest priority for the allocation of available federal resources, including the deployment of personnel and connectivity with federal data systems.

Primary Fusion Centers

- Alabama Fusion Center
- Alaska Information and Analysis Center
- Arizona Counter Terrorism Information Center
- Arkansas State Fusion Center
- California State Threat Assessment Center
- Colorado Information Analysis Center
- Connecticut Intelligence Center
- Delaware Information and Analysis Center
- Florida Fusion Center

- Georgia Information Sharing and Analysis Center
- Hawaii Fusion Center
- Idaho Criminal Intelligence Center
- Illinois Statewide Terrorism and Intelligence Center
- Indiana Intelligence Fusion Center
- Iowa Intelligence Fusion Center
- Kansas Intelligence Fusion Center
- Kentucky Intelligence Fusion Center
- Louisiana State Analytical & Fusion Exchange
- Maine Information and Analysis Center
- Mariana Regional Fusion Center (Guam)
- Maryland Coordination and Analysis Center
- Massachusetts Commonwealth Fusion Center
- Michigan Intelligence Operations Center
- Minnesota Fusion Center
- Mississippi Analysis and Information Center
- Missouri Information Analysis Center
- Montana Analysis & Technical Information Center
- Nebraska Information Analysis Center
- New Hampshire Information and Analysis Center
- New Jersey Regional Operations Intelligence Center
- New Mexico All Source Intelligence Center
- New York State Intelligence Center
- North Carolina Information Sharing and Analysis Center
- North Dakota State and Local Information Center
- Ohio Strategic Analysis and Information Center
- Oklahoma Information Fusion Center
- Oregon Terrorism Information Threat Assessment Network
- Pennsylvania Criminal Intelligence Center
- Puerto Rico National Security State Information Center
- Rhode Island State Fusion Center
- South Carolina Information and Intelligence Center
- South Dakota Fusion Center
- Southern Nevada Counter-Terrorism Center (Las Vegas, Nevada)
- Tennessee Fusion Center
- Texas Joint Crime Information Center
- U.S. Virgin Islands Fusion Center
- Utah Statewide Information and Analysis Center
- Vermont Intelligence Center
- Virginia Fusion Center
- Washington Regional Threat and Analysis Center (Washington, D.C.)

- Washington State Fusion Center
- West Virginia Intelligence Fusion Center
- Wisconsin Statewide Information Center

Recognized Fusion Centers

As the Federal Government respects the authority of state governments to designate fusion centers, any designated fusion center, including major urban area fusion centers, not designated as a primary fusion center is referred to as a recognized fusion center.

- Austin Regional Intelligence Center; Austin, TX
- Boston Regional Intelligence Center; Boston, MA
- Central California Intelligence Center; Sacramento, CA
- Central Florida Intelligence Exchange; Orlando, FL
- Chicago Crime Prevention and Information Center; Chicago, IL
- Cincinnati/Hamilton County Regional Terrorism Early Warning Group; Cincinnati, OH
- Dallas Fusion Center; Dallas, TX
- Delaware Valley Intelligence Center; Philadelphia, PA
- Detroit and Southeast Michigan Information and Intelligence Center; Detroit, MI
- El Paso Multi-Agency Tactical Response Information eXchange (MATRIX); El Paso, TX
- Houston Regional Intelligence Service Center; Houston, TX
- Kansas City Terrorism Early Warning Fusion Center; Kansas City, MO
- Los Angeles Joint Regional Intelligence Center; Los Angeles, CA
- Nevada Threat Analysis Center; Carson City, NV
- North Central Texas Fusion Center; McKinney, TX
- Northeast Ohio Regional Fusion Center; Cleveland, OH
- Northern California Regional Intelligence Center; San Francisco, CA
- Northern Virginia Regional Intelligence Center; Fairfax, VA
- Orange County Intelligence Assessment Center; Orange County, CA
- San Diego Law Enforcement Coordination Center; San Diego, CA
- Southeast Florida Fusion Center; Miami, FL
- Southeastern Wisconsin Threat Analysis Center; Milwaukee, WI
- Southwest Texas Fusion Center; San Antonio, TX
- Southwestern PA Region 13 Fusion Center; Pittsburgh, PA
- St. Louis Fusion Center; St. Louis, MO

State and Major Urban Area Fusion Centers

State and major urban area fusion centers (fusion centers) serve as focal points within the state and local environment for the receipt, analysis, gathering, and sharing of threat-related information between the federal government and state, local, tribal, territorial (SLTT) and private sector partners.

National Network of Fusion Centers

Located in states and major urban areas throughout the country, fusion centers are uniquely situated to empower front-line law enforcement, public safety, fire service, emergency response, public health, critical infrastructure protection, and private sector security personnel to understand local implications of national intelligence, thus enabling local officials to better protect their communities. Fusion centers provide interdisciplinary expertise and situational awareness to inform decision-making at all levels of government. They conduct analysis and facilitate information sharing while assisting law enforcement and homeland security partners in preventing, protecting against, and responding to crime and terrorism.

Fusion centers are owned and operated by state and local entities with support from federal partners in the form of deployed personnel, training, technical assistance, exercise support, security clearances, connectivity to federal systems, technology, and grant funding.

The Current Threat Environment and Role of Fusion Centers in National Security

Both at home and abroad, the United States faces an adaptive enemy in an asymmetric threat environment. Events since May 2009 have demonstrated that the threat to the homeland is not abating. The National Network of Fusion Centers (National Network) is uniquely situated to empower front-line law enforcement, public safety, emergency response, and private sector security personnel to lawfully gather and share information to identify emerging threats. The national security enterprise must reach beyond the capabilities of the federal government and national Intelligence Community to identify and warn about impending plots that could impact the homeland, particularly when the individuals responsible for the threats operate within the United States and do not travel or communicate with others overseas. By building trusted relationships and collaborating with SLTT and private sector partners, fusion centers can gather and share the information necessary to pursue and disrupt activities that may be indicators of, or potential precursors to, terrorist activity. With timely, accurate information on potential terrorist threats, fusion centers can directly contribute to and inform investigations initiated and conducted by federal entities, such as the Joint Terrorism Task Forces led by the Federal Bureau of Investigation.

According to the 2010 National Security Strategy (PDF, 60 pages - 1.52 MB), the federal government must continue to integrate and leverage fusion centers to enlist all of our intelligence, law enforcement, and homeland security capabilities to prevent acts of terrorism on American soil. Efforts to protect the homeland require the timely gathering, analysis, and sharing of threat-related information. Fusion centers provide a mechanism through which the federal government, SLTT, and private sector partners come together to accomplish this purpose. Beginning in 2003, the federal government, in cooperation with state and local entities, published guidance to enable fusion centers to operate at a baseline level of capability and to form a robust and fully integrated National Network. The National Network allows the federal government, SLTT, and private sector partners to participate as full contributors to, and beneficiaries of, the homeland security enterprise.

This strategic vision can be realized only when fusion centers demonstrate institutionalized levels of capability that enable efficient and effective information sharing and analysis across the National Network. This will help link the federal government with SLTT and private sector entities to more effectively share information. Given the evolving threat environment, it is vital that fusion centers quickly achieve their roles, as explained in the National Strategy for Information Sharing (NSIS), as the focal points within the SLTT environment for the receipt, analysis, gathering, and sharing of threat-related information.

Enhancing Department Resources to Support Fusion Centers

The Department of Homeland Security (DHS) has expedited the deployment of resources to fusion centers to enhance their ability to perform their mission. The DHS Office of Intelligence and Analysis (I&A), the Department's lead for support to fusion centers, has deployed over 90 personnel, including Intelligence Officers and Regional Directors, to the field. I&A also worked aggressively to deploy [Homeland Secure Data Network \(HSDN\)](#) to over 60 fusion centers. HSDN provides SECRET-level connectivity to enhance the ability of state and local partners to receive federally generated classified threat information.

Additionally, the Department significantly expanded training and technical assistance opportunities for fusion center personnel. Through its long-standing partnership with the Department of Justice (DOJ), the Department has conducted more than 300 training and technical assistance deliveries, workshops, and exchanges on topics including risk analysis, security, and [privacy, civil rights, and civil liberties](#) since 2007. By providing these resources, the Department supports fusion centers to address some of the [nation's most significant homeland security challenges](#).

Expanding the Nationwide Suspicious Activity Reporting (SAR) Initiative (NSI)

To provide guidance regarding how and where to report suspicious activities, state, local, and federal agencies worked collaboratively to develop a [Unified Message](#) that provides clear guidance regarding how to report suspicious activities, encourages agencies to work with DHS to utilize the "If You See Something, Say Something™" campaign, and emphasizes the importance of training frontline personnel.

The Department is working closely with the DOJ-led [Nationwide Suspicious Activity Reporting Initiative Program Management Office](#) to establish a standard process to identify and report suspicious activity in jurisdictions across the country. Under the leadership of I&A, the Department has made it a priority to participate in and support the implementation of the NSI while also integrating SAR processes across the National Network of Fusion Centers. The integration of NSI within both the Department and the fusion centers is a key element of fusion center outreach to law enforcement at all levels of government.

The Department has also launched the ["If You See Something, Say Something™"](#) campaign in order to engage the public to identify and report indicators of terrorism, crime, and other threats.

The Path Ahead

[Working closely with interagency partners](#) and Fusion Center Directors, the Department supports an annual [nationwide, in-depth assessment of fusion centers](#) to evaluate their capabilities and to establish strategic priorities for federal government support. The assessment focuses primarily on four Critical Operational Capabilities (Receive, Analyze, Disseminate, and Gather) and four Enabling Capabilities (Privacy/Civil Rights and Civil Liberties Protections, Sustainment Strategy, Communications and Outreach, and Security) as well as additional priority areas for the year. Leveraging data collected from the Annual Fusion Center Assessment, the Department coordinates efforts to build fusion center capabilities and mitigate identified gaps. These gap mitigation efforts are designed to assist fusion centers in becoming centers of analytic excellence that serve as focal points within the state and local environment for the receipt, analysis, gathering, and sharing of threat-related information.

For further information, please contact the Department of Homeland Security Office of Public Affairs, 202-282-8010.

<http://www.dhs.gov/state-and-major-urban-area-fusion-centers>

National Network of Fusion Centers Fact Sheet

"A fusion center is a collaborative effort of two or more agencies that provide resources, expertise and information to the center with the goal of maximizing their ability to detect, prevent, investigate, and respond to criminal and terrorist activity."

- Baseline Capabilities for State and Major Urban Area Fusion Centers (October 2008)

[State and major urban area fusion centers](#) (fusion centers) serve as primary focal points within the state and local environment for the receipt, analysis, gathering, and sharing of threat-related information among federal, state, local, [tribal](#), and territorial (SLTT) partners. Located in states and major urban areas throughout the country, fusion centers are uniquely situated to empower front-line law enforcement, public safety, [fire service](#) (PDF - 22 pages, 2.21 MB), [emergency response](#), [public health](#), [critical infrastructure protection](#) (PDF - 30 pages, 3.54 MB) and private sector security personnel to lawfully gather and share threat-related information. They provide interdisciplinary expertise and situational awareness to inform decision-making at all levels of government. Fusion centers conduct analysis and facilitate information sharing, assisting law enforcement and homeland security partners in preventing, protecting against, and responding to crime and terrorism. Fusion centers are owned and operated by state and local entities with support from federal partners in the form of:

- [Deployed personnel](#)
- [Training](#)
- [Technical assistance](#) (PDF - 40 pages, 2.43 MB)
- [Exercise support](#) (PDF - 1 page, 577 KB)
- Security clearances
- Connectivity to federal systems
- [Technology](#) (PDF - 22 pages, 1.1 MB)
- [Grant funding](#)

What Fusion Centers Do

Fusion centers contribute to the Information Sharing Environment (ISE) through their role in receiving threat information from the federal government; analyzing that information in the context of their local environment; disseminating that information to local agencies; and gathering tips, leads, and suspicious activity reporting (SAR) from local agencies and the public. Fusion centers receive information from a variety of sources, including SAR from stakeholders within their jurisdictions, as well as federal information and intelligence. They analyze the information and develop relevant products to disseminate to their customers. These products assist homeland security partners at all levels of government to identify and address immediate and emerging threats.

Beyond serving as a focal point for information sharing, fusion centers add significant value to their customers by providing a state and local context to help enhance the national threat picture. Fusion centers provide the federal government with critical state and local information and subject matter expertise that it did not receive in the past – enabling the effective communication of locally generated threat-related information to the federal government. Integrating and connecting these state and local resources creates a national capacity to gather, process, analyze, and share information in support of efforts to protect the country.

Our nation faces an evolving threat environment, in which threats not only emanate from outside our borders, but also from within our communities. This new environment demonstrates the increasingly critical role fusion centers play to support the sharing of threat-related information between the federal government and SLTT partners.

Fusion Center Priorities

"To prevent acts of terrorism on American soil, we must enlist all of our intelligence, law enforcement, and homeland security capabilities. We will continue to integrate and leverage state and major urban area fusion centers that have the capability to share classified information"

- National Security Strategy (May 2010)

In 2007, the [National Strategy for Information Sharing](#) called for the establishment of "baseline operational standards" for fusion centers. In 2008, the federal government, in collaboration with SLTT partners, published the [Baseline Capabilities for State and Major Urban Area Fusion Centers](#) (PDF, 37 pages - 4.6 MB) to establish baseline operational standards and to outline the capabilities necessary for fully operational fusion centers. By achieving the baseline capabilities, a fusion center will have the necessary structures, processes, and tools in place to support the fusion process. During the 2010 National Fusion Center Conference, Fusion Center Directors, in partnership with the federal government, distilled the Baseline Capabilities for State and Major Urban Area Fusion Centers into National Network priorities, including four Critical Operational Capabilities (COCs):

- Receive: Ability to receive classified and unclassified information from federal partners
- Analyze: Ability to assess local implications of that threat information through the use of a formal risk assessment process

- Disseminate: Ability to further disseminate threat information to other state, local, tribal, territorial and private sector entities within their jurisdiction
- Gather: Ability to gather locally-generated information, aggregate it, analyze it, and share it with federal partners as appropriate

Additionally, both Fusion Center Directors and the federal government identified the protection of [privacy, civil rights, and civil liberties \(P/CRCL\)](#) as a key priority and an important enabling capability to ensure fusion centers protect the privacy and other legal rights of Americans, while supporting homeland security efforts.

Strengthening the ability of fusion centers to execute the COCs and ensure P/CRCL protections is critical to building an integrated National Network of Fusion Centers capable of sharing information with the federal government and SLTT partners during situations involving time-sensitive and emerging threats. In September 2010, federal, state, and local officials conducted a Baseline Capabilities Assessment (BCA), the first formal assessment of fusion center capabilities. The data collected during the BCA provided a snapshot of fusion center capabilities and identified major trends, as well as strengths and gaps across the National Network.

The current focus of the federal government is to support fusion centers in mitigating the capability gaps identified by the BCA and to assist fusion centers in reaching an enhanced level of capability for all four COCs and P/CRCL protections. The Department of Homeland Security, in coordination with federal interagency partners, has developed and provided a wide range of resources and services, including a guidebook, sample policies, templates, best practices, workshops, and various training sessions, to support fusion centers in strengthening their COCs and P/CRCL protections. The Department will continue to assist fusion centers in fully achieving and maintaining the COCs and [P/CRCL protections](#).

Fusion Centers are a Shared Responsibility

In recent years, partners at all levels of government have [reiterated the need for unified and coordinated support for fusion centers](#). The federal government is committed to assisting them in becoming centers of analytic excellence that serve as focal points for the receipt, analysis, gathering, and sharing of threat-related information among federal and SLTT partners. Federal interagency partners, including Department of Homeland Security, Department of Justice, Federal Bureau of Investigation, Office of the Director of National Intelligence, Program Manager for the ISE, Office of National Drug Control Policy, and Department of Defense, are committed to providing effective, efficient, and [coordinated federal support to fusion centers](#). In turn, fusion centers support their SLTT partners by developing actionable intelligence, disseminating relevant information to homeland security partners, participating in the [Nationwide SAR Initiative](#), and supporting the maturation of their statewide fusion processes.
