Ancient Chinese Civilization: Bibliography of Materials in Western Languages

Paul R. Goldin

October 28, 2015 (updated regularly)

This bibliography aims to be inclusive from the Stone Age through the pre-Buddhist era and contains approximately 10,000 entries. Areas such as prehistoric Taiwan are not normally considered. Please do not hesitate to inform the compiler of errors or omissions, which are inevitable in a project of this scope. For the sake of concision, anthologies of papers by a single author are listed only once, under title of the volume. (The original bibliographical information of any articles revised or reprinted in such anthologies is omitted, as are the original details of articles that were later expanded into or incorporated within a book by the same author.) Book reviews, articles in encyclopedias and newsletters, exhibition catalogues, and unscholarly works for popular audiences are not normally included. Finally, the original publication date of a work that was subsequently translated or re-issued sometimes appears at the end of a citation in brackets.

Many thanks to all the colleagues who have helped over the years, including (most recently) Jens Østergaard Petersen and Sun Xiaxia.
