ADVERTISING DIRECTOR Liz Ranes

PRODUCTION MANAGER Richard Budzynski Jr.

CIRCULATION DIRECTOR Tom Dean

The SURPLUS RECORD (ISSN0039-615X) is published monthly. Copyright © 2016 Surplus Record, Inc. in U.S. Patent Office. Postage paid at Berne, IN. Printed in U.S.A. Distributed by controlled, monthly and quarterly rotated circulation to more than 144,000 rated firms throughout the U.S.A., Canada, Latin America, Europe, Asia, and other world areas. Monthly circulation of 55,000 copies is guaranteed. U.S.A. subscription prices: $43.00 per year. $65.00 two years. $80.00 three years. Foreign subscription rates on request.

Surplus Record, an exclusive publishing entity, is not affiliated directly or indirectly in any manner or means with any association, corporation or individual buying and/or selling machinery and equipment.

WE WANT YOUR...

- AC and DC MOTORS - ALL SIZES
- TRANSFORMERS 1ph & 3ph - ALL SIZES
- WE SHIP ANYWHERE FROM OUR HUGE INVENTORY AND YOUR SATISFACTION IS ALWAYS GUARANTEED

AC Motors
- 3-Phase • Single-Phase • Premium-Efficiency
- Metric • Inverter Duty • Vector Duty
- Baldor, Marathon, Lincoln, Universal, US, Teco, ABB, and many other manufacturers

DC Motors
- Baldor, Reliance, ABB, US, GE, and others

Power Transmission
- Gear Motors (AC & DC) • Gear Reducers
- Variable Speed
- Baldor (Grant), Doris, Koellman, Grove, Foote-Jones

Drives
- AC: Inverter Duty • Vector Duty • Variable Speed
- Eddy Current • DC: SCR Variable Speed
- Mechanical Variable Speed
- Baldor, Saftronics, Carotron, Dynamatic, Control Techniques, Reliance, and many others

Transformers
- 3-Phase, Single-Phase • Dry and Oil
- Full Voltage Range • Rex, Federal Pacific, Cooper, Dongan, Jefferson, and others

Plus
- Gear Motors • Reducers • Transformers • Controls
- Variable Speed Drives • Generators • Phase Converters
- Motor Starters • Motor Covers • Motor Bases • Starters
- Power Factor Correction • Emergency Service Available Including Expert Repairs and Rewinding on All Makes of Electric Motors.

THE SURPLUS RECORD TABLE OF CONTENTS

The alphabetical listing below is a *partial* list of equipment listed individually or grouped under prime industrial functions.

Air Compressors & Accessories 40
Air Compressors, Centrifugal 40
Air Compressors, Dryers, Desiccant 42
Air Compressors, Reciprocating 45
Air Compressors, Rotary 45
Air Compressors, Tank Mounted 52
Air Conditioning & Water Chiller Equipment 53
Assembly Machines 53
Automatic Screw Machines & Chuckers 53
Balancing Machines 55
Balers 55
Banding Lines/Coil Packaging Lines 56
Bar Feeds 56
Benders 57
Benders, CNC 97
Bevelling Machines 60
Blowers & Fans 60
Boiler Accessories 369
Boilers, Firetube 369
Boilers, Watertube 373
Boring Mills, Horizontal 61
Boring Mills, Vertical 64
Brakes, Apron 67
Brakes, CNC 104
Brakes, Press 67
Broach Sharpeners 75
Broaching Machines 75
Bus Duct 76
Bus Plugs 378
Capacitors 380
Casting Machines, Continuous 76
Centering Machines 77
Chemical, Petroleum, Gas & Processing Equipment 77
Chillers 78
Chip Wringers 95
Circuit Breakers, Air 381
Circuit Breakers, Gas 408
Circuit Breakers, Molded Case 415
Circuit Breakers, Oil 429
Circuit Breakers, Vacuum 430
CNC Machinery & Equipment 95
Coating Equipment 153
Coil Handling Equipment 154
Comparators, Optical 164
Compressors, Process Gas 165
Construction & Mining Equipment 166
Converters, Phase 430
Coolant Filtering Systems 107
Cooling Towers 78
Couplings, Adjustable Speed 430
Cranes & Equipment 169
Cut Off Machines 176
Cut-To-Length Lines 155
Cylinders, Air & Hydraulic 178
Deburring Machines 178
Degreasers 179
Die Handling Equipment 179
Disintegrators 179
Distribution Centers (Panels), Switchboards 431
Draw Benches 180
Drilling & Tapping Machines, Automatic 180
Drills, Heavy Duty Multiple Spindle 181
Drills, Heavy Duty Single Spindle 181
Drills, Horizontal 181
Drills, Indexing Tables, Production 182
Drills, Radial 182
Drills, Turret 184
Drives, A.C., Variable Frequency / Variable Speed 431
Drives, D.C., Variable Speed 433
Dumpers, Including Drum Dumpers 184
Dust Collectors 184
Dynamometers 433
Edging Lines 186
Electrical Discharge Machines 107
Engine Parts 434
Engines, Diesel 166
Engines, Natural Gas 435
Engraving Machines 186
Environmental Testing and Remediation Equipment 187
Expanders 187
Eyeletters 187
Fabricators 187
Feeders 187
Filtration Systems 187
Finishing Machines 187
Flame Cutters 108
Flangers 188
Food Processing Equipment 188
Forging Machinery & Equipment 188
Forklift Trucks 190
Foundry Equipment 191
Frequency Changers 194
Furnaces & Ovens 194
Fuses 436
Gear Chamferers 203
Gear Cutter Sharpeners 203
Gear Deburrers 204
Gear Generators 204
Gear Grinders 109
Gear Hobbers 205
Gear Increasers 438
Gear Lappers 206
Gear Reducers 438
Gear Shapers/Shavers 206
Gear Testers 207
Generators, A.C. 445
Generators, D.C. 466
Generators, Hydro-Electric 467
Generators, MG Sets, D.C. 467
Grinders, Centerless 110
Grinders, Cylindrical 110
Grinders, Disc 214
Grinders, Internal 111
Grinders, Surface 111
Grinders, Tool & Cutter 112
Headers 224
Heaters 225
Hoists, Monorail & Trolley, for Cranes 174
Hones, Vertical 225
Hydraulic Power Units 226
Induction Heating & Melting Units 227
Ironworkers 228
Jig Borers 112
Jig Mills 113
Keyseaters 229
Laboratory & Research Equipment 229
Lappers 229

Lasers, CNC 113
Lathes, Engine 129
Lathes, Precision & Second Operation 240
Lathes, Turret 130
Levelers 242
Lifts 243
Lightning Arresters 468
Locomotive Parts 243
Locomotives, Diesel & Electric 244
Machining Centers, CNC 130
Magnets, Lifting 244
Marking Machines 244
Material Handling Equipment 244
Measuring Machines 147
Millers, Horizontal 147
Millers, Plain 245
Millers, Planer 147
Millers, Production 247
Millers, Universal 247
Millers, Vertical 147
Milling & Centering Machines 249
Motor Control Centers 469
Motor Controls And Starters 470
Motor Starter Contactors Only 476
Motors, A.C., Adjustable Speed 479
Motors, A.C., Brake 481
Motors, A.C., Gear 482
Motors, A.C., Multi-Speed 483
Motors, A.C., Pump 486
Motors, A.C., Slip Ring 486
Motors, A.C., Slip Ring, Crane, Hoist & Mill 490
Motors, A.C., Squirrel Cage 494
Motors, A.C., Synchronous 608
Motors, A.C., Vertical 612
Motors, D.C., Constant & Variable Speed 632
Motors, D.C., Crane & Mill 628
Motors, D.C., Gear 632
Motors, D.C., Variable Speed w/Power Supply 632
Motors, Variable Speed Drives 662
Nibblers 250
Notching Machines (Notchers) 250
Nut Formers 250
Packaging Equipment 250
Paint & Powder Systems & Equipment 251
Planers 253
Plants, Manufacturing & Power 253
Plants, Process 254
Plasma/Flame Cutters, CNC 148
Plastic & Rubber Equipment 254
Plating Equipment 260
Pointers (Including Forging Pointers) 260
Polishers (Including Buffing Jacks) 260
Pollution Control Systems 260
Power Supplies 260
Presses, Cut-off 261
Presses, Die Tryout & Spotting 262
Presses, Double Action 262
Presses, Extrusion 263
Presses, Eyelet & Transfer, Metalworking 263
Presses, Gap Frame 263
Presses, High Speed & Automatic 265
Presses, Hydraulic 259
Presses, Laminating 276
Presses, Molding 276
Presses, O.B.I. 281
Presses, Powdered Metal 285
Presses, Straight Side 285
Profilers 150
Programmable Logic Controllers (PLC'S) 663
Pumps 87
Punches, CNC 150
Railroad Cars/Equipment 306
Reclosures 664
Rivet Spinners 306
Riveters 307
Robots, Industrial 308
Rollers, Thread 309
Rollformers 334
Rolling Mills 312
Rolls 314
Rolls, Plate Bending 315
Routers 317
Sanders 318
Saws, Band 318
Saws, Cold, Friction and Carbide 323
Scales 325
Scrap Choppers 325
Scrap Yard Machinery & Equipment 325
Shapers 326
Sheet Metal & HVAC Machinery 333
Slitters 335
Slitting Lines 159
Slotters 336
Spline Rollers 336
Storage Equipment 337
Straighteners 159
Stretch Forming Machines 337
Swaging Machines 338
Sweepers/Scrubbers 338
Switches 664
Tappers 339
Testing Equipment 339
Threaders 340
Tooling & Accessories 341
Transfer Machines 348
Transformers, Constant Current 670
Transformers, Electric Furnace 203
Transformers, Single Phase 672
Transformers, Three Phase 675
Tube End Finishing & Forming Machines 348
Tube Machinery 350
Tube Mills 351
Tumbling Barrels 194
Turbines, Steam w/out Generator 730
Vacuum Chambers 353
Valves 352
Vibratory Finishers 353
Voltage Regulators 731
Washing Machines 253
Water Jet Cutting 153
Water Treatment Equipment 356
Welding Machinery & Equipment 356
Welding Manipulators, Positioners & Turning Rolls 359
Wire Machinery 153
Woodworking Machinery 368

Sell Your Surplus to Latin America

through our sister publication - Utillaje.

Since 1993, Utillaje has been the source for over 100,000 Latin American industrial firms for locating and buying machinery & equipment from North America.

- Advertise to over 100,000 manufacturing firms in Latin America.
- Printed and mailed monthly from Mexico City for timely delivery.
- Utillaje is a publication for Latin American industry by Latin Americans.
- All descriptions of machinery & equipment are translated into meaningful actual Spanish & engineering terms.
- All advertised listings appear on the Internet with links back to advertiser'shome page.

2016: Strategizing Metals Purchasing Decisions in a Low Cost World

As we begin our launch into 2016, the US manufacturing sector has served up a rather curious holiday feast (and hangover). We can summarize the recipe as equal parts contraction and growth (in different areas of the economy – more on this in a minute), continued commodity price pressure and greater uncertainty over planning and buying strategies. As Spend Matters recently observed, "the U.S. manufacturing sector contracted in November, reaching its lowest levels since June 2009. The Institute for Supply Management's November PMI registered 48.6%, down from 50.1% in October."

But where does this leave us with the industrial metals supply chain? On the one hand, there are peeps of growing consensus that prices may have bottomed, particularly steel and may begin rising like they have in prior years at the end of Q4 into Q1. The health of certain sectors and strong buying requirements might support this thinking: order books look good for aerospace and defense, automotive and food service equipment (the construction industry is variable depending on region and sub-sector).

Yet on the other hand, others are fighting for survival (and demand is down or off entirely). Oil and gas, energy, heavy machinery and equipment (tied to mining) remain sluggish. But more important, if you take the "glass half full argument" none of these things matter (individually) in setting the global price. What matters is the perception of global fundamentals among producers, investors, buyers and traders – the entire ecosystem. In short (exempting the December PMI number), even though the US manufacturing economy is somewhat healthy – across a number of important sub-sectors – it's not enough to pull the overall commodity market out of its global bear slump and continued downward price pressure.

But more important: where does this leave different players in the metals buying ecosystem? Let's start with buyers – at large companies and small. One item that is vexing buyers at the moment is trying to time the low of the market. At the moment, there is more temptation than ever to do this. Historically, what happens in most industries is that organizations forecast demand for the year and buy long-term forward to meet demand – i.e., they buy strategically. But because prices have been falling and continue to fall, people are hesitant to do that – they are second-guessing their normal strategy. As a result, the temptation is to try and come in and buy long-term forward but folks remain nervous that prices could continue to fall. It is important to note this dynamic exists for large and small buyers alike.

One step up the metals food chain, the situation appears worse. Balance sheet health has generally declined considerably for distributors and service centers in the past 12 months. As a result – and based on lower demand – many have been working on reducing inventory. Levels have come down, but they are still higher than average. These firms find themselves in a trickier position than that of their customers. They want to be careful not to take on too much inventory. Even with lower global prices, they have been hesitant to make large overseas purchases. They are nervous because they don't want to be caught holding high price inventory. Hence, many are taking a wait and see approach.

At the mill level, firms have been ogling to raise prices, particularly for steel. Yet we believe mills are unlikely to get what they want early in 2016. Overall, mills have done a good job cost cutting since the last commodity bear market. They are better positioned than they were because they are much more operationally efficient (generally – across metals) than in past sustained downturns. Yet they still don't control demand – or the perception of demand – and hence are unlikely to be able to push markets upwards.

Jason Busch and Lisa Reisman are Editors at Large. Contact Lisa Reisman if you have questions about metals buying or inventory strategies (lreisman@metalminer.com).

Grass Roots Whispers

Jim Truesdell

The Workplace Gets More Casual

The workplace is changing. Communication and procedural changes brought about by technology make radical differences in the way our business world functions, and the impact of a changing culture is altering the way people relate to each other in the office, store, and plant. Nowhere is this more evident than in expectations for appropriate office attire.

The move toward informality has taken place over a half-century. We are a long way from the post-World War II "organization" man in the grey flannel suit, who typified the careerist in the 1940s and '50s. When young people in the '60s challenged the status quo and tested authority and social norms, they began a chain reaction that has moved steadily to a flattening of organizational hierarchies and an emphasis on individual expression that continues to evolve. The high-profile celebrity personalities of tech gurus and computer entrepreneurs have conditioned people to the idea that casual is cool, and few new generation workers want to conform to a dress standard they see as outdated and irrelevant.

So how does an owner/manager respond to today's millennial worker (and even Gen X'er's and Baby Boomers) who sees no need to come to work in a coat and tie, women wearing dresses/pants suits, or even dress shirts and blouses? More and more, workers seem to expect the office uniform to permits jean, open-toed shoes, and t-shirts, sundresses, and tattoos. Where is the line between respect and disrespect for customers, coworkers, and management?

To a certain extent, companies must realize that the world has changed. That includes their customer base. In some marketplaces, the customer who once might have been impressed by a salesperson's effort to dress up for a presentation will now be uncomfortable in the presence of a vendor who is dressed excessively formally. We have long observed this in the hard goods industries. Sales-people who show up in coat and tie at a power plant or small contractor's office may be out of place and start at a disadvantage in connecting with the plant or shop foreman.

The whole question of business attire raises its head during the job interview process.

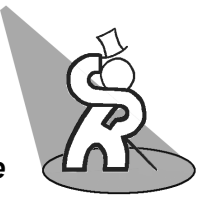
About the Author — Jim Truesdell is president of Brauer Supply Company, a machinery, heating, and industrial distributor headquartered in St. Louis. He is assistant professor in the MBA program of Saint Louis University and is the author of Total Quality Management: Reports from the Front Line.

The Workplace Gets More Casual

(concluded from previous page)

It would seem to me that the wise person overdresses a bit when applying for a job unless the nature of the company or position has expectations of informality that would make that tie look ridiculous. When people come to interview for sales or office positions, I am always amazed when they appear in polo shirts, tennis shoes, or wearing a baseball cap as the meeting proceeds, or showing considerable skin, with excessive dangling jewelry, overdone make-up and perfume, and even chewing gum or answering cell phone calls in the midst of the interview. Do they not give any advance thought to the image they are portraying? Or are they feeling so entitled that they believe their prospective employer must bend and accommodate their personal habits and style? Have they been so coddled and fussed over by doting parents that they expect to be accepted the way they are and have no intention of putting a best foot forward in the job application process?

Indeed, a survey of employment practices and attitudes conducted by human resources consultant Adecco a couple of years ago showed that one of the biggest interview mistakes young job applicants make is wearing inappropriate attire, Since, despite the return of reasonable economic times, getting that first job is always a tricky proposition, it seems this is a faux pas a young career aspirant can ill afford.



The best rule of thumb is to do a little research. Cruise by in advance, look at a company's website, or ask the receptionist directly about the standard office attire when you call in to confirm an interview appointment. Then, step it up a notch since you are trying to send the message that you are the answer to their hiring prayers. Once hired, it has always been a smart guideline to dress as those on the next step of the office hierarchy do. After all, that's where you want your career to go.

Not all of the accommodating needs to be done by the applicant or new employee. Today's employer is finding that sometimes the best and most talented people have no regard for traditional standards of office dress. This may be consistent with their expectations for a workplace that reflects their own worldview and their central place in that world. They may want flexible work hours, freedom to work off-site, high quality of life at the office, and constant feedback from their managers as they move toward the rapid promotions for which they have built-in expectations. They may seem somewhat entitled, but many of these new and younger workers have the technical skills and ability to relate to new customers that your business will need. The business intending to attract and keep these workers will find a way of integrating their personal styles, interests, and personalities into the organization, even if it means a tolerance for informality that conflicts with an older generation's perception of what constitutes respect for the customer, the boss, and the work environment! ■

New and Refurbished EDMs - WHY BUY USED?

For about the same amount of money, you can get a quality refurbished EDM including on-site training and 6 month warranty.

NEW EDMs by CHMER EDM Wire • Sinker • Small Hole

Refurbished EDMs: Agie, Brother, Charmilles, Japax, Sodick and more
New EDM Tooling and Software, Consumables and Repair Parts

USED & REBUILT BLAST EQUIPMENT

REMANUFACTURED MACHINES BUILT TO NEW EQUIPMENT STANDARDS

TUMBLAST AND BARRELS

1 Goff 1 1/2 cu ft. Tumblast

1 Pangborn 6GNR, rubber belt, rebuilt,
- 1 year warranty

1 Pangborn 12 cu. ft. 12GNR, rubber belt,
- with loader, excellent condition

1 Wheelabrator 28' Super II, mang flights, remf'd,
- excellent condition

1 Wheelabrator 34 Super III, manganese flights
- remf'd, 1 year warranty

TABLES

1 Wheelabrator 96" swing table, 52" work height,
- completely rebuilt, new condition

1 Wheelabrator #1 Multi-table, (10) 8" dia. tables

TABLES (continued)

1 Wheelabrator #1A Multi-table, 2-Wheels, (8) 19" dia.
- tables, indexing, independ. abrasiv., sweeps, new condition

1 Wheelabrator #1A Multi-table, side-mount wheels, 1988

EQUIPMENT SPECIALS

1 Wheelabrator - BCP 2-Wheel, 30 HP Spinner Hanger, 48"x72",
- 2,096 total hours, 43" dia. x 48" H wk. envelope

1 Wheelabrator 2-Wheel, 15 HP DownBlast Belt Conveyor,
- 18"H x 26" W, '00

1 Wheelabrator/BCP 4-Wheel, 10 HP wheels, Structural Cleaner,
- wk cap. 12-1/2 x 12-1/2, ent. & exit conv., excellent condition

1 Wheelabrator 4-Wheel 40 HP In-Line Bar Stock unit
- up to 6" dia. rounds & w/do shapes & flats

1 Goff Spinner Hanger, Model 24 x 60, excellent condition

ITC INDUCTION TECHNOLOGY CORPORATION

INDUCTION MELTING AND HEATING EQUIPMENT

We design, manufacture, repair, and rebuild induction power supplies, coils, furnaces, water-cooled power cables, and water cooling and recirculation systems. Since 1979

- **30Kw, 9600 Hz**, VIP 30-96, Inductotherm, Power Supply, Reconditioned
- **50 Kw, 3kHz** VIP PT-30 w/100lb. hydr. tilt furnace. Reconditioned
- **75Kw, 3kHz,** Inductotherm, VIP Power Trak, Rebuilt
- **150Kw, 1kHz**, Inductotherm, VIP Power Trak, Rebuilt
- **175Kw, 3kHz**, Inductotherm, VIP Power Trak, Rebuilt, 1 yr. warranty
- **250Kw, 1kHz,** Inductotherm, VIP Power Trak, Rebuilt
- **750Kw, 1kHz,** Inductotherm, VIP Power Trak, Rebuilt
- Russell Dry Air Water Cooler & **5 HP** Closed Loop Water Pump Station, - Will Cool Induction System **up to 75 kW**
- **All Equipment Tested and Guaranteed with Warranty**
- **Parts and Service Available on Everything We Sell**

WE BUY USED INDUCTION MELTING AND HEATING EQUIPMENT
